

INTRODUCTION

Hello my name is... [Full Name]

Today, we will discuss... Eating Meat

My partner and I, believe...

Eating meat is _____ (desirable or **undesirable**).

To begin, let's discuss... Causing Illnesses.

ARGUMENT

[Statement] debate topic + _____ (good or bad)

ex. Eating meat will... cause illness.

Eating meat will... cause illness.

Because...

1.) *First...* Cow Poop on the Meat

According to... an animated film called "the Meatrix", 2003

It states... At the meat processing center, the assembly line is moving too fast and this causes cow poop to get onto the meat.

This means... if we eat meat, we could get sick from how dirty the meat is.

2.) *Also...* People Have Been Hospitalized

According to... TIME for Kids, November 8, 2019

It states... The Centers for Disease Control (or CDC), warned us that eight people were sent to the hospital, and one person died, because the ground beef they ate had dangerous bacteria on it.

This means... if we keep eating meat, then we can get really sick or even die because of the poop and other things that are on the meat.

Therefore... Eating meat will cause illness.

Thank you.
